treatments and
hydrotherapy services.

DERMALIFE 2G SPA OCEANA

Premium Hydrofusion multi-sensory spa capsule

Innovative thinking, premium design and exclusive functions are the driving forces behind the Dermalife family of multi-sensory spa systems. They represent an holistic system of balance and restoration, creating a revolutionary improvement for spa and skin care treatments. Dermalife capsules allow you to offer clients truly ancient spa solutions to modern problems.

Dermalife spa systems are stunning in design and provide the perfect spa environment that is easy to use. The powerful synergy and variety of their functions will enable your spa/clinic to offer each individual the care adapted to their needs, lifestyle and desires.

For centuries, the famous exclamation of the Roman Emperor Nero, “Sanitas Per Aqua” (SPA), meaning “Health Through Water”, has symbolized people’s instinctual belief and practice in water’s curative and transforming powers.

Spa Oceana is a state of the art multi-sensory system for body treatments and hydrotherapy services. Spa Oceana is the first capsule in the Dermalife family of spas to combine Hydrofusion, infrared heat and steam, with a Vichy shower system inside a powerful air-jet massage hydrotherapy tub. Spa Oceana calls upon the natural healing powers of water, steam, heat and massage for unlimited restorative, customized spa services.

Hydrobath

Hand held water massager

Spa Oceana is the ultimate in versatile sensory sophistication

The system will exhilarate and rejuvenate clients with twenty-two (22) underwater hydrobath massage jets, a personal underwater hand held massager, and stimulating chromotherapy inside its 240-litre personal hydrobath tub. Spa Oceana 2G offers four (4) different hydrobath programs for a variety of luxurious therapeutic services. Above the hydrobath tub is the hydrospace system. Features include soothing and invigorating LED Chromotherapy, moisturizing Hydrofusion, various water massage therapies, and a hand-held shower, perfect for removing excess skincare products. It provides ten (10) unique pre-set programs to enhance any spa menu with a variety of therapeutic treatment options.

New Dermalife 2G Advanced Hydrofusion multi-sensory features include:

Hydrofusion heat therapy

This amazing engineering innovation creates a single blended energy through the harmonization of radiant Infrared heat and steam. Hydrofusion delivers these natural energies individually or in tandem to optimize body cleansing, detoxification, moisturization, hydration and product penetration. Provide faster and more intensive dermal stimulation, slimming and detoxification benefits with every treatment session. Enhance the therapeutic benefits of Hydrofusion with the powerful Ceramic Dry Heat for the most advanced treatment results.

Turbo ceramic dry heat

Six (6) powerful turbo-fans, nearly 900 watts strong, quietly deliver a flow of ambient dry heat to 48°C inside the body chamber. Heat can be intense to enhance weight loss programs or moderate to accompany relaxing, drying functions after moisturizing Hydrofusion or hydrotherapy treatments.

Exciting DVD and stereo entertainment capabilities

Dermalife Spa Oceana 2G is equipped with a colourful LCD display programmed to provide DVD entertainment, enhancing your clients' relaxation while they experience the full treatment benefits of the spa capsule. Just connect any DVD player system to instantly watch a movie on the high-resolution LCD monitor. The

high-tech, multi-lingual LCD also displays all features and operations of the spa capsule including the DVD application. Allow your clients to further enhance their experience with high quality audio for the DVD, or other audio source, through the 150W waterproof speaker or a headphone jack for personal listening.

Powerful LED treatments and ambient lights

Spa Oceana 2G has four (4) sets of Colorbath LED lamps above and below the body for intense colour coverage in the body chamber. Clients will feel rejuvenated as the capsule illuminates the senses and the surrounding environment.

Liquid vitamin 'tropical mist' systems

Two (2) tropical mist diffusers disperse even, gentle 'tropical rain' during selected sessions. Liquid vitamins dispersed in the tropical mist will nourish and soothe clients' skin.

Therapeutic pulsation massage

Pre-programmed pulsation settings accentuate clients' pleasure with delicate to deep stimulating waves for relaxation and pain relief. Strength and rhythm of the massage varies throughout the pre-set programs for an invigorating or relaxing user experience.

Ultra comfort bed and head pillow

The bed is now softer and more comfortable than ever. The new design has added cushion for more support and relaxation. The bed's exterior materials are stronger and more resilient.

Double steam diffusion

Broad diffusion of steam is delivered through two improved and larger steam jets for total-body saturation.

Language programming (optional)

Spa Oceana 2G allows for a more diverse client base with display programming now available in many languages including English, Spanish, French, German, Russian, Portuguese, and Polish. Additional languages soon to be released include Chinese (Mandarin) and Arabic.

State-of-the-art vichy shower system, handheld shower and more

Spa Oceana 2G has truly unique, therapeutic water features, including ten (10) over body vichy shower heads, two (2) soothing foot massage jets, alternating hot/cold water programs, and a personal hand held shower, perfect for

rinsing skincare product from the body and instrumental in the cleaning of the system between clients. Indulgent under water features include a 240 litre, personal water/air-jet tub, twenty-two (22) under body hydrobath jets, an under water hand held massager, and a thermostatic mixer to ensure constant water temperature. These exclusive water capabilities take this elementary experience to a refined level.

Therapeutic vitamin, mineral and aromatherapy systems

Dermalife Spa Oceana 2G arouses the senses with two reservoirs that vaporize and disperse vitamins, minerals, aromas, and herbal extracts for overall product absorption and experience enhancement. Custom mixtures of essential oils, herbal extracts, and more can be combined for each client's specific needs and desires.

Glowing translucent exterior shell

Add a beautiful and stunning focal point to your spa décor. The appearance of the advanced spa capsule constantly changes as the shell reflects and glows in the surrounding light or from the interior Colorbath LED Chromotherapy colour system, creating an aura of wellness in the room.

Economical water consumption

Dermalife 2G Spa capsules utilize sophisticated programming technology to provide luxurious Spa services with amazingly low water consumption.

Using an average of less than 2 litres of water per minute*, Dermalife Spa Oceana capsules are leading the industry in water conservation technology while still allowing your clients to enjoy magnificent water-based spa and wellness treatments.

Spa Oceana program	Water usage (litres)
High Heat Workout	64

*Average of pre-set programs, using recommended 250-300 kPa water pressure.

Hydrotherapy

Cleansing

Cellulite and slimming

Multiple treatment options

Skin rejuvenation and anti-ageing

Treatments

Elite whole body indulgence

Spa Oceana's state of the art design allows you to offer numerous wellness treatments for your clients. Offering these treatments shows your commitment to the health and well-being of your clients. Spa Oceana's 240 litre hydrotherapy treatment tub supports various body care treatments involving body wraps, mud and sea salts from any product range.

A sample of some of the most popular treatments you will be able to offer with Spa Oceana include:

Hydrotherapy

Offer a wide range of body care treatments with four pre-set hydrotherapy programs that control 10 back massage jets, 8 side massage jets and 4 foot massage jets. Hydrotherapy is the therapeutic use of water in its different temperatures and physical states, such as water, steam and ice. The Spa Oceana, a 240 litre hydrotherapy system, will not only help to relieve aches and pains, it will also assist the body in eliminating wastes, stimulating the metabolism and immune system.

Slimming/detoxification/cellulite

All of the products, equipment and treatments available for reducing the appearance of cellulite and slimming the body may be complemented and improved with Spa Oceana treatments. Effective cellulite reduction and slimming can only be performed by vigorously increasing circulation, stimulating metabolism, detoxifying and eliminating excess fluids. Used in conjunction with products containing cellulite-combating ingredients, Spa Oceana is a vital link to obtain the results your clients are looking for.

Re-mineralizing/moisturizing/hydrating

Body wrap treatments eliminate impurities through exfoliation and the application of products containing essential oils, herbs, muds, clays, seaweed or algae. These natural ingredients are rich in vitamins and minerals and help replenish lost nourishment in dry, damaged or ageing skin. With the added boost of an effective heat and hydrotherapy treatment, these products will leave even the most damaged or congested skin fresher, cleaner, more hydrated and glowing with health.

Anti-ageing

The skin is our body's largest organ. Healthy skin acts as a protective envelope for the body and is vital to maintain overall health and beauty. Anti-ageing treatments are dramatically enhanced with Spa Oceana. The intensive hyperemia, moisturizing, toning, improved elasticity and total skin nourishment provided by Hydrofusion stimulates the development of collagen, creating a soft, youthful skin texture. By combining the relaxing, steady warmth and stimulating hydrotherapy experience with seaweed or mud applications, the absorption of the anti-ageing and detoxifying ingredients is greatly heightened, leaving the skin supple and glowing.
